

e-Prescribing

Measure Description: At least one permissible prescription written by the MIPS eligible clinician is queried for a drug formulary and transmitted electronically using CEHRT.

DENOMINATOR: Number of prescriptions written for drugs requiring a prescription in order to be dispensed other than controlled substances during the performance period; or number of prescriptions written for drugs requiring a prescription in order to be dispensed during the performance period.

NUMERATOR: The number of prescriptions in the denominator generated, queried for a drug formulary, and transmitted electronically using CEHRT.

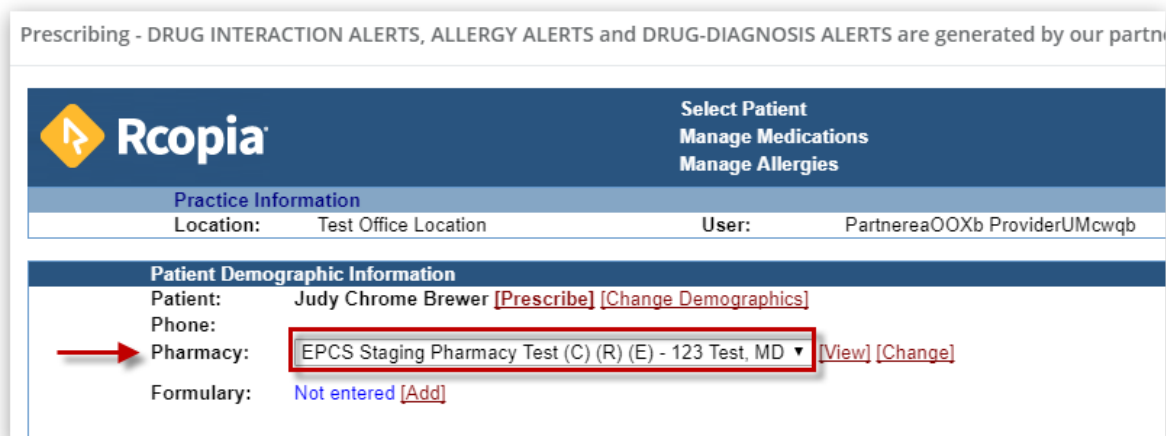

THRESHOLD: At least 1 permissible prescription.

How to generate and electronically transmit prescriptions using iSmart EHR.

1. Open **Chart Record** (encounter during performance period), switch to **e-Prescribing** and click **'Add/Manage RX'** button.

2. Select appropriate **pharmacy** to send prescription to.

3. Type in a medication you are going to prescribe (e.g. aspirin) and click 'Find' button.
